CAREER OBJECTIVE

Seeking a challenging career with a progressive organization that provides an opportunity to capitalize my technical skills and abilities in the field of Mechanical Engineering.

EDUCATION

2012- 2015 • NDMVP's KBTCOE Nashik / BE (Mechanical Engg)- 69%

2009 - 2012 • Govt. Polytechnic Jalgon / Diploma (Mechanical Engg)- 74%

PROFESSIONAL SUMMARY:

PMP® and Six Sigma Green Belt certified Project Manager with **10+ years** of experience in Product Change Management, Governance, and PLM (Windchill). Expert in leading cross-functional teams through the full product change lifecycle, from ideation to SOP, ensuring comprehensive documentation and traceability. Proven ability to establish governance frameworks and "single source of truth" reporting systems that minimize operational disruption and drive informed decision-making across R&D, Supply Chain, and Quality.

SKILLS

Value engineering (VAVE)

- Project planning - Gantt, Smartsheets, MS Excel.
- Manage project scope delivery and successful execution within technical, schedule, cost and quality targets.
- Prepare and maintain metrics for project for cost, quality, technical performance and delivery through all of the development phases.
- Align customer requirements with goal of the project to give direction to project team.(VOC to VOE)
- Idea Generation
- Preparing test plans and procedures.(Validation and verifications)
- Business case preparation and approvals
- Supplier discussions and RFQ
- Track monthly savings for Projects - Forecast vs Actuals, Std & PO
- Cross-Category alignments and approvals - Procurement, tooling, process, Material planners, Subsystem, Quality, etc
- Thought maps
- Product quality analysis
- Systematic problem solving and analytical abilities.
- Manage PPAP approvals and Quality engineer alignments.
- Engineering change & BOM management

ERP Tools

- Windchill PLM - Part lifecycle management, Change requests, change notice, New Part creation and revision, systematic multi-structured BOM changes, Windchill best practices
- SAP - costing, Inventory management, BOM analysis, production planning forecast, Change effectivity dates
- Excessively used MS Excel, PowerPoint, Google sheets, Drives for Data Analysis and Presentation

Product Design and Development (NPD)

- Plastic and sheet metal design
- GD&T
- Tolerance stack up
- FMEA, DVP&R
- Concept Generation
- Concept Evaluation Matrix (PUGH matrix)
- Product Maps
- ASME and ISO standards
- UL,ANSI standards

EXPERIENCE

Whirlpool of India Ltd / Analyst (Project Manager)

Sep 2023- Present, Pune

- Supplier development to launch Sourced products from Whirlpool.
- Verification and validation of Sourced products from Ellica India to Whirlpool India
- Working closely with CSR team to maintain Whirlpool Safety and Regulatory standards
- Leading multiple sourcing projects for Various Regions and Across multiple products like Hobs, MWO, BIO, Cooktops etc
- Governance & Change Lifecycle: Manage the full product change lifecycle and BOM management using Windchill PLM, ensuring strict adherence to internal processes, regulatory standards, and systematic multi-structured BOM changes.
- Centralized Reporting & Analytics: Establish and maintain metric-based reporting systems to track project cost, quality, and technical performance, providing a single source of truth that enables transparent decision-making for leadership and stakeholders.
- Cross-Functional Coordination: Act as the central coordination point for Product Change activities, facilitating alignment between Procurement, Quality, and Manufacturing teams to assess cross-functional impacts and ensure seamless execution of sourcing projects.

Johnson Controls India Ltd / Senior Engineer

Nov 2021 -Sep 2023, Pune

- Manage development projects for Fire and Smoke dampers.
- Preparing FMEA & DVPs for Component Level and Subsystem Level.
- Preparing BOM Structure.
- Interaction with Cross functional Teams – Tool room, Manufacturing & Process teams & suppliers.

Whirlpool of India Ltd / Engineer (Specialist engineering)

Jan 2016 -Nov 2021, Pune

- Leading Cost, Quality and MOB Projects from Ideation to SOP.
- Converting VOC to VOE and creating a Robust packaging Design for Heavy Consumer electronic Products.
- Delivered subsystem designs for new product development designs.
- Responsible to meet predefined annual cost targets for NAR - FSR
- Systematic planning and preparation of the annual Idea generation workshop calendar
- Preparing business case proposals and getting financial approvals
- Preparing Gantt, project plans for all projects and ensuring that the timelines are met
- Perform target risk assessment and develop mitigation plans accordingly
- Aligning required stakeholders depending on the scope of each project GSS, Tooling, Quality, Manufacturing, Process, Logistics, Material planners, PA, Codes engineers, Safety
- Prepare validation plans using FMEAs and get approval from Product approvers, codes, subsystem and safety engineers
- Plan and coordinate evaluation, development and product approval testings, ensure availability of samples and products
- PPAP approvals and SQE alignment
- Plan and perform Pilot runs, trial builds and Alignment with manufacturing on the proposals
- BOM changes for production

Key Projects

- As System Integrator, ensuring subsystem functionality with different teams. Launched 5+ products in Asia Pacific, achieving a \$15M DCM impact and reducing time to market by 22%. Performed process mapping for **Elica** products, eliminating waste, and promoting knowledge development. 600+ SKU Validation, PS9 Lab & adhering QCO's.
- Bottom Chassis hard tooling(\$160K)-By cost analysis found out that part was overpriced because of this part and upon exploration it was understood that the supplier was producing this part out of stand-alone tooling due to initial low volume. Proposed Progressive tooling, worked on Business case approvals for tooling capital and was able to reduce the standard cost of components by 75%.
- Craftsmanship improvement for M2.5 (Quality Improvement project):Door hinge rail design improvement to maintain Door to Console Gaps as per designated tolerance values-Resulted in patent US16683898.(Title - APPLIANCE DOOR HINGE ASSEMBLY).
- Led strategic Microwave localization project from China to India along with supplier development for SKD Operation.
- "NPD G45 packaging: design packaging subsystem for Europe ovens": Design of EPS packaging components, Preparation of DFMEA, PUGH matrix.

Key Highlights

- Leading Project execution initiative for the team to track execution progress and develop systematic methods for ease of execution
- US patent filed for (United States **patent no. 16683898 SUB-12531**) "Appliance door hinge assembly".
- Onsite System Integrator at Italy and Poland for VAVE and NPD project in Q2 2019
- Prepared Project health scorecard for Team using Google Data Studio to get 1 Page glimpse of On-Cost, On-Time and other specific details for the team and individual projects.
- Prepared Master assemblies tracking file for Wall Oven product category
- "You are a star" in 2019 for analyzing different Gas cooktops with respect to features and helping in architecture reduction programme by communizing structural components, which would result in cost saving.
- "You are a star" in 2020 for "G45 chassis development"
- Completed WPD experience training - Whirlpool Product delivery Process
- Implemented 2 Projects in 2020 to deliver savings of \$620K USD annual
- Worked as a master assembler for one of the project in NPD.

CERTIFICATIONS

PMP certified by PMI (Valid till Oct2028)

Oct 2025, Pune

OpeX Six sigma Green Belt.
